1.1	Search query in CSA.....	4
1.1.1	Search in the databases ASSIA, Sociological abstracts, Social services Abstracts performed in CSA at Stockholm university.....	4
1.2	Search in EBSCO multiple databases	13
1.2.1	Searches in Academic Search Premier, Business Source Premier, Communication & Mass Media Complete, EJS E-Journals, ERIC, Research Starters – Business, Research Starters – Education	13
1.3	Search in Medline through Ovid.....	22
1.4	Search in PsycINFO through OVID	23
1.5	Search profiles in the review of qualitative studies	29
1.5.1	Literature searches in international databases.....	29
1.5.2	Literature searches in the database DiVA.....	33
1.5.3	Literature search in LIBRIS	34

1.1 Search query in CSA

The searches with EBSCO and CSA were performed with support of the bibliographic resources at Stockholm University Library.

The search profiles were developed in collaboration with a team of librarians from Stockholms University specialized in literature searches: Lotten Häggström, Marie Lövgren and Viveka Vessberg. Tomas Johansson supported with issues related to RefWorks.

Martin Angeland, Karl Berglund, Anna Björnberg and Jan Sydof, from Stockholm University Library, contributed to the project working with the literature databases and management of the references in RefWorks.

1.1.1 Search in the databases ASSIA, Sociological abstracts, Social services Abstracts performed in CSA at Stockholm university

The search string with terms on population found 331163 references (Search Query #1)

The search query with mental health terms found 317700 references (Search Query #2)

The search query with method terms found 45415 references (Search Query #4)

The search query with educational terms found 102564 references (Search Query #5)

The combined search of all the four queries resulted in 4254 references, of which only the 3880 peer reviewed references was retained.

The duplicates were removed automatically by the CSA browser. 3380 unique references were exported to the project database in Refworks.

Search Query #7 ((elementary school students) or (high school students) or (junior high school students) or (kindergarten students) or (preschool students) or (special education students) or (vocational school students) or (infant) OR (infancy) OR (infants) OR (infant's) or (kid) or (kids) or (kid's) or (child) OR (children) OR (childhood) OR (child's) or (schoolchild) OR (schoolchildren) OR (schoolchild's) or (school-aged children) or (schoolaged children) or (adolescent) OR (adolescence) OR (adolescent's) OR (adolescents) or (youth) OR (youths) or (teen) OR (teens) OR (teenager) OR (teenagers) or (compulsory school) or (kindergarten) or (prekindergarten) or (preschool) or (elementary school) or (grammar school) or (middle-school) or (junior highschool) OR (junior high school) or (comprehensive school) or (secondary school) or (upper secondary school) or (high school) or (senior high school) or (vocational school) or (remedial school) or DE="Primary Education" or DE="Early Childhood Education" or DE="Elementary Education" or DE="Adult Basic Education" or DE=Kindergarten or DE="Elementary School Students" or DE="High School Students" or DE="Junior High School Students" or DE="Middle School Students" or DE="Child Care" or DE="Compulsory Education" or DE="Preschool Education" or DE="Elementary

Multiple Databases

1.2 Search in EBSCO multiple databases

The search query with terms about educational aspects found 1.579.480 peer reviewed references.

The search query with terms about the population found 1.703189 peer reviewed references.

The search query with terms about mental health found 1.523.403 peer reviewed references.

The search queries with terms about the methods (S7, S8, S15) found 656.882 peer reviewed references. The combination of these queries resulted in 8494 references that were exported manually to the project database in Refworks.

1.3 Search in Medline through Ovid

The search profile were created by information scientist Christine Wickman och librarian Susanne Gustafsson, KIB, Karolinska Institutet.

Databasen Medline är den största och mest använda databasen inom medicin och angränsande områden. Databasen täcker ca 6 000 tidskrifter från hela världen och kan sökas med hjälp av olika sökgränssnitt. På Karolinska institutet söks Medline via PubMed eller via Ovids gränssnitt. Medlinematerialet är indexerat med termer från den kontrollerade vokabulären MeSH (Medical Subject Headings).

PubMed täcker hela databasen Medline plus material som inte är indexerat, dvs referenser till artiklar som levererats direkt från förlagen och som inte har hunnit indexeras än eller som aldrig kommer att bli indexerat (dvs aldrig blir inkluderat i Medline).

En sökning på MeSH-termer fångar enbart referenser till indexerade artiklar.

PubMed lämpar sig inte för breda uttömmande sökningar som kräver en kombination av många olika sökmängder. Sökningen gjordes i Medline via Ovidsystemet.

Sökningen på ämnesområdet gjordes med hjälp av MeSH-termer. Termerna är strukturerade hierarkiskt med överordnade termer och underordnade mer specifika termer. Exp (explode) framför termen betyder att både den överordnade och alla dess underordnade termer söks.

1. För att fånga relevanta referenser relaterade till skolan/förskolan valde vi en begränsning till MeSH-termerna SCHOOLS och SCHOOLS, NURSERY. En begränsning till COHORT STUDIES, LONGITUDINAL STUDIES och SYSTEMATIC REVIEWS diskuterades. Värderingen av sökresultatet med och utan den begränsningen resulterade i beslutet att avstå från en sådan begränsning för att inte missa intressanta studier.
En begränsning i tid diskuterades och det bestämdes att inte begränsa sökningen i tid. Sökresultatet med sammanlagt **1484 referenserna** levererades.
2. Som komplettering av den sökningen skapades en sökstrategi som inte begränsar till 'schools' eller 'schools, nursery' som MeSH-termer utan till barn och ungdomar i den önskade åldersgruppen, dvs 2-18 år. Det bestämdes att denna sökmängd skulle begränsas till Longitudinal studies etc, både som kontrollerad term och som fritexttermer. Resultatet av denna mycket breda sökning begränsades till referenser som innehöll ett ord som börjar på school (school*) i artikelns titel för att öka relevansen. På det viset hittades **461 unika referenser** till.

Resultatet av den senaste sökningen kompletteras med en sökning på school* i abstraktet, något som resulterade i **1014 referenser** till.

För att bredda sökningen i databasen Medline ffa avseende de minsta barnen kompletterades sökprofilen med en sökning på viktiga söktermer i titel eller abstrakt. Termerna valdes och resultatet värderades.

Följande termer valdes: se även den bifogade sökstrategin

44 (underachievement* or low achievement* or precocious development* or academic achievement motivation or academic aptitude or achievement motivation or achievement potential or creativit* or gifted or expertise or academic aptitude or ability grouping or attendance).ti,ab.

45 (cognitive skills or communication skills or coping skills or interpersonal skills or literacy skills or social skills or thinking skills or pre-academic skills or peer relation* or friendship* or peers).ti,ab.

Sökningen på de relevanta åldersgrupperna utökades med en fritextsökning på begrepp som kindergarten*, toddler*, preschool*, pre-school*, nursery school*, adolescen*, youth*. * står för trunkering och betyder att man söker på alla begrepp som börjar på det viset.

Efter exkludering av redan levererade referenser, resulterade kompletteringen i **534 nya unika referenser**.

Sammanlagt levererades **3493 referenser** från databasen Medline.

1.4 Search in PsycINFO through OVID

Efter mailkontakt får KIB i uppdrag att även göra en litteratursökning i **PsycInfo via Ovidsystemet**PsycINFO är specialdatabasen i psykologi och angränsande områden. PsycInfo produceras av APA (The American Psychological Association). Som kontrollerad vokabulär används APAs egen tesaurs med många mycket specifika termer inom de psykologiska och sociologiska områdena. Databasen täcker inte bara tidskrifter utan även böcker, dissertationer och rapporter.

Sökresultatet begränsades till enbart 'journal articles' och 'reviews'. Ingen begränsning i tid gjordes.

Sökprofilen bifogas.

EXP framför söktermen betyder att termen är en överordnad term med underordnade (ofta många, mer specifika) termer och att både den överordnade och alla dess underordnade termer söks. Sökningen på kontrollerade termer kompletterades med en sökning på ord i titel och abstrakt.

Sammanlagt levererades **3013 referenser** från databasen PsycInfo.

1.5.2 Literature searches in the database DiVA

DiVA - Academic Archive On-line, is a Swedish publishing system for research and student theses and a digital archive for long-term preservation of publications from 24 Swedish universities.

<http://www.diva-portal.org/smash/search.jsf>

The following literature searches were performed:

1.5.2.1 Search among student theses

Any of the Swedish words

Flickor, pojkar, barn, tonåringar, unga, ungdomar, elever, tonårsflickor, tonårspojkar
(translation: girls, boys, children, teenagers, young, youth, students)

AND

Any of the Swedish words

intervjuer berättelser samtal uppfattningar erfarenheter attityder upplevelser
(translation: interviews, narratives, conversations, perceptions, experiences, attitudes)

AND

Any of the words

Skola, psykisk hälsa, välbefinnande

Another search with the word elevperspektiv (student perspective) gave further theses

1.5.2.2 Search among Research publications

(dissertation and reports)

Any of the Swedish words

Flickor, pojkar, barn, tonåringar, unga, ungdomar, elever, tonårsflickor, tonårspojkar
(translation: girls, boys, children, teenagers, young, youth, students)

AND

Any of the Swedish words

intervjuer berättelser samtal uppfattningar erfarenheter attityder upplevelser
(translation: interviews, narratives, conversations, perceptions, experiences, attitudes)

Limitation: search between years 2000-2009

Exclusion: perceptions and experiences of adults

1.5.3 Literature search in LIBRIS

LIBRIS is a national search service providing information on titles held by Swedish university and research libraries, as well as about twenty public libraries.

Various searches were performed in LIBRIS

Among dissertations with

Any of the words:

Ungdomar, unga, barn (youth, young, children)

AND

Any of the words:

Välbefinnande, hälsa (well-being, health)

Further searches among dissertations were performed in LIBRIS with the words elevsyn, elevperspektiv (students' views, student perspective)

Manual searches among publications and report from:

Rädda barnen /Save the children Sweden

BRIS / Barn rätt i samhället

The Swedish National Board for Youth Affairs, Ungdomsstyrelsen

(additional search: "health" in subject or title AND "school" or "education" in subject or title)

The National Agency of Education

(additional search: "health" in subject or title AND "school" or "education" in subject or title AND "student perspective" in subject or title)
Myndigheten för skolutveckling
